

Waushara County
Methamphetamine Task Force
MINTA (Meth Is Not the Answer)

September 2005

Dear Concerned Citizen:

Waushara County has recently formed a Task Force to address the increasing concern for the increased manufacture and use of Meth in Central Wisconsin. Meth has a devastating impact on all segments of our communities.

The Task Force is bringing together individuals from Human Services, Police, Public Health, Court System, Schools, Clergy, and anyone else that is willing to participate in this project to maintain and improve the places we call home. The Task Force is committed to exposing those that chose to illegally use and manufacture drugs, eradicating drugs from our communities and educating citizens to help.

The following educational opportunities are being provided at no cost to Waushara County residents:

September 27, 2005	Poy Sippi Fire Department
October 4, 2005	Wild Rose Fire Department
October 11, 2005	Wautoma Fire Department
October 18, 2005	Hancock Fire Department

These sessions will begin at 6:30 pm and last approximately 1 ½ hours. Each session will cover the same topic including:

- What is Meth?
- How does it affect the body?
- How can you recognize the signs and symptoms of Meth manufacture and use?
- What can you do to assist in solving the problem?
 - Join your neighbors in helping to find a solution.
 - Bring a friend.
 - Watch and listen to the local media for upcoming events.
 - Together we CAN make a difference!!!!!!!

Sincerely,

Sheriff David R. Peterson
Task Force Member
